located virtually at top of steep hill, East of Tham Sao Hin

Cave is large rockshelter much modified by stal & breakdown. ~~speleothems~~ speleothems are nice in places, good encladoliths + anthodites or stalagmites. no arch. material seen.

Also. In ~~one~~ Northernly tower on top of same hill is another rockshelter ~~with~~ ^{completely} at least 2 other entrances on top of ^{by steep cliffs} tower (one of which contains ^{complete} the rim and c. 40% of a burnished pot, a few shards and small pieces of bone). Cave is complex boulder maze in 3d - not surveyed.
