[Andara](#) This repository is maintained by the Tresviso Caves Project and relates to data for the Eastern Massif (Andara) range of the Picos de Europa, Northern Spain. More information on the [Tresviso](#) expedition site. [Belize](#) This repository contains data from the SWCC expeditions to the Toledo District of Belize, Central America (2001-2013). Further information and reports is on the [website](#) .

[CheddarCatchment](#)

This repository is maintained by UBSS and MCG, with many other clubs and individuals helping to supply and obtain the data. The data is mainly released under Creative Commons license. (see license information in the dataset).

[CountyClare](#)

This repository is maintained by UBSS, with many other clubs and individuals helping to supply and obtain the data. The data is mainly released under Creative Commons license. (see license information in the dataset).

[DYO Catchment](#)

Survey data for Dan yr Ogof in Survex format starting from the main backbone by Dave Judson & friends in the 1960s with additional data from Mike McCombe, Stuart France and others from about 1990 onwards. The cave is currently being re-surveyed using DistoX and this will result in a merged dataset for Therion in due course.

[MatienzoCaves](#)

Some of the data from the Matienzo Caves (Cantabria, northern Spain) expeditions. This will expand when data from the larger systems (Four Valleys 57km and the South Vega System 31km) are uploaded. More details about each numbered folder (relating to one of more than 4000 sites) can be found on the

[Matienzo Caves](#)

website.

[Neath](#)

This repository is maintained by UBSS with other clubs and individuals helping to supply and obtain the data. The data is mainly released under Creative Commons license. (see precise license information in the dataset).

[WookeyCatchment](#)

This data set was originally set up for the Swildon's survey; data is steadily being added, both new and archive.

[Yorkshire](#) This repository was set up by MMMMC and Red Rose Caving Club and contains all the Leck Fell and Three Counties System data. It was originally hosted [knowledgef orge](#)   .
